Technology Center 2600

51 and automatically overwriting previously stored program material including at least some program material which has not been previously accessed based on determinable criteria developed from a known set of priorities,

said known set of priorities which includes at least one priority other than updating of existing program materials.

REMARKS

In response to a further telephone communication from Examiner Ton, applicant herewith includes claim 80 in the requested modified form.

This modification should place the application into condition for allowance containing the existing claims together with this modified claim 80.

Favorable action is solicited.

Respectfully submitted,

William S. Lightbody
